

Upload from local	2.5: The user now could upload their own music cover from local. After uploading, the page should have a music player that the user could control if he wants to play or not. Also, the user could delete the cover if he wants to. The page should have a nice and clean UI.	2.0: Have a nice layout for the cover page. Upload is successful but play the cover song is not functional. Also the user could not delete the upload file.	1.0: could not upload and no cover page.
Play music from Playlist	2.5: From the playlist, each song is clickable and the user could select which song to play. The procedure to play a certain song should be clear.	2.0: The songs are clickable and the users could choose to play or skip. But play music is not functional.	1.0: Songs from the playlist is not clickable and could not play the music preview from the playlist.
Recommendation.	2.5: Based on the genre from the playlist, the user will get recommendations from the profile page, and the recommendation page should also has a nice UI, including the songs title and each song is clickable, then the user could choose to add to their playlist.	2.0: The recommendation page does have a clear UI, but the recommendation is not based on genre and the user could not add the music to their playlist.	1.0: Empty page and implementation is limited.

Make post	2.5: From the profile page, the user could choose to write post and post on their profile page. The user should be able to write in a textfield and then confirm to post the text. Also they should be able to delete the post if they choose to.	2.0: The user could write post but posting is not functional (not visible to other users). The user also does not have any options to delete the post.	1.0: Not implementation at all on this functionality or trivial implementation (only has a simple textfield on the profile page)
Test	2.5: Selenium tests implemented for all the functionalities + manual test plans	2.0: Selenium tests implemented for all the functionalities	1.0 : only have manual test plans or only implemented some test cases
