

This is the home page of my final project web. There are 5 tabs on top. Currently Music, gig and video pages are empty. If you click the music tab, it will look like the following:

---

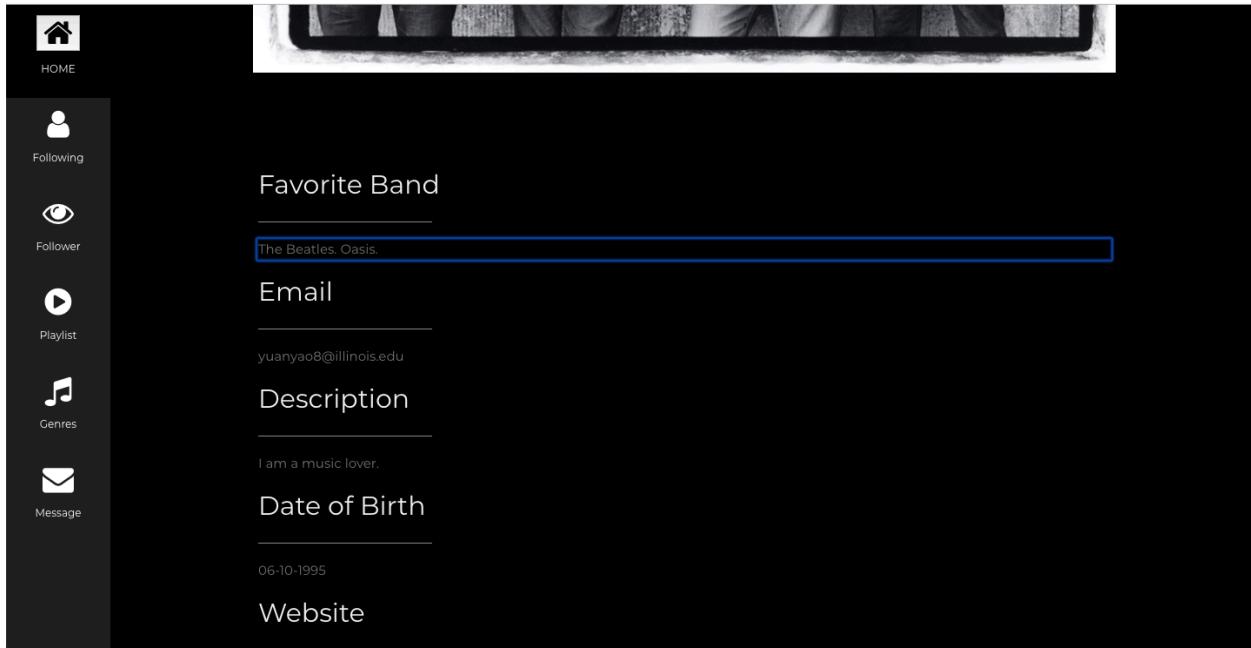

*This is the music page*

If you click the sign up tab, a sign-up box will pop up and you could type in the email, user name and password.

After click the sign up button, the page will be directed to the profile page. The profile page contains side navigations and some basic information about the user. Currently, it is editable but could not be reused.

A screenshot of a mobile application interface. On the left is a vertical navigation bar with icons for HOME (a house), Following (a person), Follower (an eye), Playlist (a play button), Genres (a musical note), and Message (an envelope). The main content area has a dark background. At the top, the text "I'm Yaoxiaosui." is displayed. Below this is a large, framed black and white photograph of four men standing together outdoors. The man on the far left is wearing sunglasses and a striped shirt. The man next to him is wearing a denim jacket. The man in the center has a beard and is wearing a light-colored trench coat. The man on the far right is wearing a dark jacket. The entire interface is presented in a dark-themed style.

Click the home button at the side will direct to the home page. Then you could use the username and password to sign in again.
